

**Good Production
Better Price
Best Quality**

TRANS CAN TRAFÖ İZOLASYON SAN. ve TİC. LTD. ŞTİ.
PRODUCTION AND SALE OF TRANSFORMER & ELECTRICAL INSULATION MATERIALS

ABOUT TRANS CAN

We embodied our know-how and knowledge accumulation in the transformer and electricity industry by establishing our company in 2000. We brought a new breath, competition and quality to the transformer industry

We are proud to identify the customer demand in a realistic way and make them buy the appropriate insulation material and prevent them from unnecessary and wrong spending by leading them as a company.

We furnished technical support and production efficiency to our valued clients.

Our company, having ISO 9001: 2008 quality certificate, works with the understanding of Good Production, Better Price and Best Quality

We manufacture and sell electrical insulation materials for transformers in a closed production area of 6500 m², 1000 m² of outdoor area and in an administrative building with an area of 450 m².

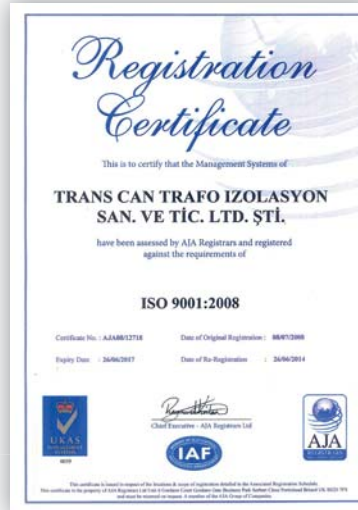

We produce all the required insulation materials for Distribution Transformers and Power Transformers from 5 MVA to 350 MVA and including 400 kV series.

We provide services for Turkey and European, Middle East and North and South African countries.

We supply insulation materials required for Motors, Coils and Dry-Type Transformers and make cutting and placement works thereof in our company.

You are one step ahead with TRANS CAN.

We extend our most sincere thanks and regards.

MISSION

As TRANS CAN family, we aim to be a center of production with an understanding of Good Production, Better Price and Best Quality in the Turkish and global market through provision of products and services in line with customer requirements and expectations in the transformer -electricity industries.

VISION

To become a respected global actor rapidly growing and preferred in the Transformer and Electrical Insulation Materials market.

To Our Corporate Values

- To pace with the rapid change in our globalized world through utilization of technology and change in the commercial and social areas
- To become a modern enterprise, comply with the laws and develop continuously
- To furnish the requirements of our esteemed customers to whom we feel responsible in a timely manner and as quality products
- To ensure the establishment of quality with participation of all of our employees and in cooperation therewith
- To give value to humans and engrain the will of achieving
- To respect the environment
